

# ***Motorola MTP850Ex ATEX TETRA Radio***

MOTOA4 TETRA Mission Critical Portfolio

# ***MTP850EX ATEX RADIO FEATURES***

Motorola's MTP850Ex TETRA portable terminal provides high quality communication with comprehensive user safety and class leading ATEX & IECEx specifications allowing use when in environments containing potentially explosive gas and dust.

Motorola is a world leader in the development and deployment of TETRA communication solutions, and the MTP850Ex ATEX TETRA radio delivers safe and reliable communications for users with a powerful set of features to harness the capability of TETRA.

## ***HIGH PERFORMANCE COMMUNICATION***

With 1 watt audio power the MTP850Ex delivers best in class audio performance in the typical noisy environments where specialist users from industry or public safety operate. The MTP850Ex has a high level of robustness specially designed for industrial environments.

## ***COMPREHENSIVE USER SAFETY***

The MTP850Ex can be used in explosive gas and dust environments due to its high level of protection – including gas Zone 1 and 2, and dust Zone 21 and 22 respectively. Operational safety is further enhanced with a range of features including:

- state of the art integrated GPS receiver providing the ability to locate personnel through the radio, improving user safety and resource management.
- Internal "Man Down" alert - this fully integrated solution triggers an emergency procedure when the carrier of the radio remains motionless for a set period or falls down.

## ***SIMPLE BUT POWERFUL USER INTERFACE***

The simplified keypad with large button surface makes the MTP850Ex easy to use with gloves. Combined with the large scalable display fonts and icons, the MTP850Ex facilitates operation in difficult environments with limited visibility.

## ***DATA APPLICATIONS CAPABILITY***

The integrated WAP browser and Multi-Slot packet data enables rapid access to critical information in the field. Applications are further enhanced with ability to have simultaneous Short Data Service (SDS) and Multi-Slot packet data services via TNP1 protocol.

# MOTOROLA MTP850EX ATEX TETRA TERMINAL

The TETRA system is now widely used in Mining, and Oil and Gas and other industries. In many cases the environment will be hazardous due to the presence of explosive dust or gasses. A TETRA terminal which can be used with confidence in these environments is required. Other agencies such as fire and rescue, customs, or border enforcement agents will also be required to operate in hazardous areas. Motorola has developed and tested the MTP850Ex to be used in these situations, together with a range of ATEX compatible accessories.

## DESIGN FOR THE MISSION

**The MTP850Ex is one of the latest products that embodies the practice of Designing Products that are Second Nature in their Operation**

Motorola has integrated human response factors into the design of its public safety communications equipment for more than 25 years. For instance, Motorola was the first to locate the emergency button on its radios at the bottom of the antenna, making it easy for the operator to find it, feel it, without even looking down in an emergency.

### FIT FOR THE ENVIRONMENT

*Motorola imposes a harsh testing regime on all new radios, usually far exceeding the standards. The MTP850Ex has been fully tested to the demanding requirements for intrinsically safe radios in **both explosive gas and dust**, as well as shock and water resistance.*

Motorola also ensures that the buttons controlling the most critical functions are highly accessible for public safety users. "Volume, push-to-talk and channel controls are the three most important features of a radio. In a Motorola radio, those three controls will never be demoted to a user tree," says Mark Palmer, design integration manager of Human Factors Design Research and User Interface Design at Motorola. "That means that under high stress situations, individuals don't even have to think about how to access them. In essence, we give people information in a way in which they can process it."

Motorola's work in this area has resulted in one other key benefit for its customers: a reduction in user training costs. For instance, when Motorola set out to design Mission Critical radios for the European market, Motorola has worked with customers to identify what the biggest potential obstacle was regarding the migration to the radios. The response has been "Training." With most new communications systems, this customer had to dedicate as many as two days to train the team on new equipment, that meant many days of lost productivity. In contrast, the Mission Critical radios designed by Motorola tested very high on the usability scale, reducing the need for extensive training.

In the case of the MTP850Ex this focus on the mission has resulted in a user interface that is easy to see, audio that is easy to hear in loud industrial environments, and simple controls which can be used when wearing thick gloves.

**APPLICATIONS  
THE MTP850EX IS  
SUITED TO THE  
NEEDS OF  
OPERATORS IN A  
RANGE OF RISK  
ENVIRONMENTS.**

At the incident scene, coordinating resources is critical for a safe, successful outcome. The MTP850Ex delivers comprehensive communications with best in class audio and class leading ATEX certification for safe use in gas and dust environments.

The integrated GPS receiver and WAP browser harness the integrated data capabilities to enhance access to information.

**Key features**

- Best in class audio
- Simplified keypad with large buttons
- Comprehensive user safety features

**FIRE AND RESCUE**

- DEALING WITH FIRE INCIDENTS
- DEALING WITH ACCIDENTS FUEL, GAS AND OTHER EXPLOSIVE SUBSTANCES

At the incident scene, coordinating resources is critical for a safe, successful outcome. The MTP850Ex delivers comprehensive communications with best in class audio.

**Key features**

- Best in class audio
- Designed for use with gloves
- Large icons and easy to read display

**OIL AND GAS EXTRACTION**

- ONSHORE AND OFFSHORE PRODUCTION
- OIL AND GAS FIELDS

The distribution of oil and gas requires optimum efficiency and safety. The MTP850Ex enhances performance through comprehensive voice and data services and the ability to be used in gas and dust environments.

For operators monitoring remote facilities, user safety is enhanced with integrated "man down" alarms, automatically calling for assistance when needed, with the capability to report location through the built in GPS receiver.

**Key features**

- Integrated GPS receiver for safety and efficiency
- WAP browser for access to databases
- Comprehensive user safety features

**OIL AND GAS DISTRIBUTION**

- OIL AND GAS PIPELINES
- OIL TANKERS SHIPS / HARBOURS
- ROAD TANKER LOADING DEPOT

The comprehensive safety features of the MTP850Ex make it ideal for use in environments with presence of explosive gas or dust.

The MTP850Ex delivers best in class audio performance in the typical noisy environments encountered in industrial environments and is enhanced with a range of ATEX certified accessories.

**Key features**

- ATEX gas and dust certification
- Man down alarm for user safety
- Large controls for use with gloves

**INDUSTRIAL AND MANUFACTURING**

- PETROCHEMICAL REFINING AND PROCESSING
- CHEMICAL, PHARMACEUTICAL MANUFACTURE
- FOOD PROCESSING
